3. Financial instruments hierarchy and investments at fair value (continued)

(b) Level 3 hierarchy:

The following table presents the changes in fair value measurements of financial instruments classified as Level 3. These financial instruments are measured at fair value utilizing non-observable market inputs. The net realized losses and net change in unrealized losses are recognized in the consolidated statements of comprehensive loss.

Investment at fair value	Opening balance at January 1	Purchases /loans	Proceeds	Net realized losses	Net unrealized gain(losses)	Ending balance
June 30, 2018	\$ 2,661	\$ -	\$ -	\$ -	\$ 70	\$ 2,731

Transfers between levels of fair value hierarchy are deemed to have occurred at the date of event.

Within Level 3, the Company includes private company investments and other investment instruments such as loans to investees and convertible debentures which are not quoted on an exchange. The key assumptions used in the valuation of these instruments include (but are not limited to) the value at which a recent financing was done by the investee, company-specific information, trends in general market conditions, the share performance of comparable publicly-traded companies and a strategic review.

The following table presents the fair value, categorized by key valuation techniques and the unobservable inputs used within Level 3 as at:

Valuation technique	June 30, 2018		December 31, 2017	
	Fair value	Unobservable inputs	Fair value	Unobservable inputs

3. Financial instruments hierarchy and investments at fair value (continued)

(b) Level 3 hierarchy (continued):

For these Level 3 investments, the inputs used can be highly judgmental. A +/- 25% change on the fair value of these investments will result in a corresponding +/- \$683 (December 31, 2017 +/- \$665) change to the total fair value of the investments.

The sensitivity analysis is intended to reflect the uncertainty inherent in the valuation of these investments under current market conditions, and its results cannot be extrapolated due to non-linear effects that changes in valuation assumptions may have on the fair value of these investments. Furthermore, the analysis does not indicate a probability of such changes occurring and it does not necessarily represent the Company's view of expected future changes in the fair value of these investments.

4. Financial assets other than investments at fair value

	As at June 30, 2018	As at December 31, 2017
Cash and cash equivalents	\$ 6,689	\$ 7,510

All amounts above are classified as financial assets at amortized cost and are short-term in nature.

5. Financial liabilities

	As at June 30, 2018	As at December 31, 2017
Accounts payable and accrued liabilities (a)	\$ 442	\$ 392

The carrying values of accounts payable and accrued liabilities approximate their fair values due to the short-term nature of these instruments.

11. Management of capital

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying assets and liabilities. There were no changes to the Company's objectives in managing and maintaining capital during the three and six months ended June 30, 2018 and June 30, 2017. The Company is not subject to any capital requirements imposed by a regulator.

The Company's objectives when managing capital are:

- (a) to allow the Company to respond to changes in economic and/or marketplace conditions by maintaining its ability to purchase new investments;
- (b) to give shareholders sustained growth in shareholder value by increasing shareholders' equity; and
- (c) to maintain a flexible capital structure that optimizes the cost of capital at acceptable levels of risk.

The Company is meeting its objective of managing capital through detailed review and performance of due diligence on all potential investments and acquisitions. Management reviews its capital management approach on an on-going basis and believes that this approach, given the size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements and there were no changes in its approach to capital management during the three and six months ended June 30, 2018 and June 30, 2017.

12. Risk management

Financial instrument risks:

The investment operations of Pinetree's business involve the purchase and sale of securities and, accordingly, the majority of the Company's assets and liabilities currently comprised of financial instruments. The use of financial instruments can expose the Company to the following risks.

- (a) Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's objective in managing risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. The Company achieves this by maintaining sufficient cash and investments. As at June 30, 2018, the Company was holding cash and monies at deposit in brokers accounts of \$8,594 and investments of \$10,773 (\$9,407 and \$9,268 as at December 31, 2017).

The following table shows the Company's contractual undiscounted cash flows which are payable under financial liabilities on the unaudited condensed consolidated interim statement of financial position as at June 30, 2018.

The following table shows the Company's contractual undiscounted cash flows, including expected interest payments, which are payable under financial liabilities on the consolidated statement of financial position as at December 31, 2017.

Accounts payable and accrued liabilities	\$ 392	\$ 392	\$ -	\$ -	\$ -
	\$ 392	\$ 392	\$ -	\$ -	\$ -

(b) Market risk

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will significantly fluctuate due to changes in market prices. The value of the financial instruments can be affected by changes in interest rates, foreign exchange rates, and equity and commodity prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favourable prices. A 10% change in closing trade price of the Company's investments would impact net income by \$424 based upon balances as at June 30, 2018.

(c) Interest rate risk:

Interest rate risk is the risk that the fair value of future cash flows from a financial instrument will fluctuate because of changes in market interest rate. The Company's exposure to interest rate risk relates to its ability to earn interest income on cash at variable rates. The fair value of the Company's cash and investments affected by changes in short term interest rates will be minimal. A 1% change in interest rates impacts net income by \$67 based upon balances at June 30, 2018. There were no changes to the way that the Company manages interest rate risk since December 31, 2017. Pinetree does not hedge against any interest rate risk.

(d) Currency risk:

Currency risk is the risk that the fair value or future cash flows of the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's operations are exposed to foreign exchange fluctuations, which could have a significant adverse effect on its consolidated results of operations from time to time.

The Company may have financial instruments denominated in U.S. dollars, Australian dollars and British pounds. A change in the foreign exchange rate of the Canadian dollar versus another currency may increase or decrease the Company's obligations due to brokers and increase or decrease the value of its financial instruments.

There were no changes to the way that the Company manages currency risk since December 31, 2017. The Company believes that it is exposed to foreign exchange risk (U.S. dollar) but does not actively hedge its foreign currency exposure although Pinetree's foreign exchange risk is, to a certain extent, mitigated by the Company's foreign exchange denominated investments. 14. New accounting changes

As at the date of authorization of these unaudited condensed consolidated interim financial statements, the International Accounting Standards Board ("IASB") and the International Financial Reporting Interpretations Committee has issued the following new and revised Standards and Interpretations that are not yet effective for the relevant reporting periods and the Company has not early adopted these standards, amendments and interpretations. However, the Company is currently assessing what impact the application of these standards or amendments will have on the unaudited condensed consolidated interim financial statements of the Company. The Company intends to adopt below standard, if applicable, when the standard becomes effective:

IFRS 15, *Revenue from Contracts with Customers* ("IFRS 15"), was issued in May 2014, which replaced IAS 11, *Construction Contracts*, IAS 18, *Revenue Recognition*, IFRIC 13, *Customer Loyalty Programmes*, IFRIC 15, *Agreements for the Construction of Real Estate*, IFRIC 18, *Transfers of Assets from Customers*, and SIC-31, *Revenue – Barter Transactions Involving Advertising Services*. IFRS 15 provides a single, principles based five-step model that will apply to all contracts with customers with limited exceptions, including, but not limited to, leases within the scope of IAS 17; financial instruments and other contractual rights or obligations within the scope of IFRS 9, IFRS 10, *Consolidated Financial Statements* and IFRS 11, *Joint Arrangements*. In addition to the five-step model, the standard specifies how to account for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. The incremental costs of obtaining a contract must be recognized as an asset if the entity expects to recover these costs.

The standard's requirements will also apply to the recognition and measurement of gains and losses on the sale of some non-financial assets that are not an output of the entity's ordinary activities. IFRS 15 is required for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted. The adoption of the new standard did not have a material impact on the financial statements of the Company.

15. Commitment

Under the terms of commercial occupancy leases the Company is committed to pay \$21 in 2018 and \$nil thereafter.
